### Una storia di qualità imprenditoriali per un'industria di qualità vera.

Da oltre 60 anni la MACO è presente sul mercato nazionale ed internazionale per la vendita di Ferramenta e Accessori per il Mobile, da vero leader nella produzione di cricchetti a scatto, chiusure magnetiche, ruote, scivoli, reggipensili, livellatori, reggipiani, passacavi e ferramenta in genere per il mobile. Gli articoli sono realizzati utilizzando materiali di prima qualità e sono caratterizzati da una vasta gamma di colori e finiture per soddisfare tutte le richieste dell'utilizzatore. Il vero punto di forza è la capacità di rispondere prontamente alle esigenze del mercato, ascoltando i bisogni dei clienti e sviluppando sempre nuovi progetti. Per meglio implementare la produzione, la MACO si è trasferita nel 2006 in una nuova e modernissima sede di 10.000 mq, di cui 6.000 mq coperti, orgogliosa di continuare ad offrire, solo ed esclusivamente, articoli di origine Italiana.

### A history of managerial quality to get a company of real quality.

For more than 60 years MACO has been selling Hardware and Furniture Fittings to the Italian and the international markets, as the leader in the production of push-latches, magnetic catches, castors, silent feet, cabinet hangers, adjustable legs, supports, cable-passages and any small fittings. Items are manufactured by high quality materials and are characterized by a wide range of colours and finishes so as to meet all customer's requirements. The real strong point is the capacity to come up to the demands of the market, by listening to the customers' needs and by always developing new projects. So as to better implement its production, since 2006 MACO has moved to a new and very modern factory of 10.000 m<sup>2</sup>, of which 6.000 m<sup>2</sup> are covered, proud to go on offering items of Italian origin only.

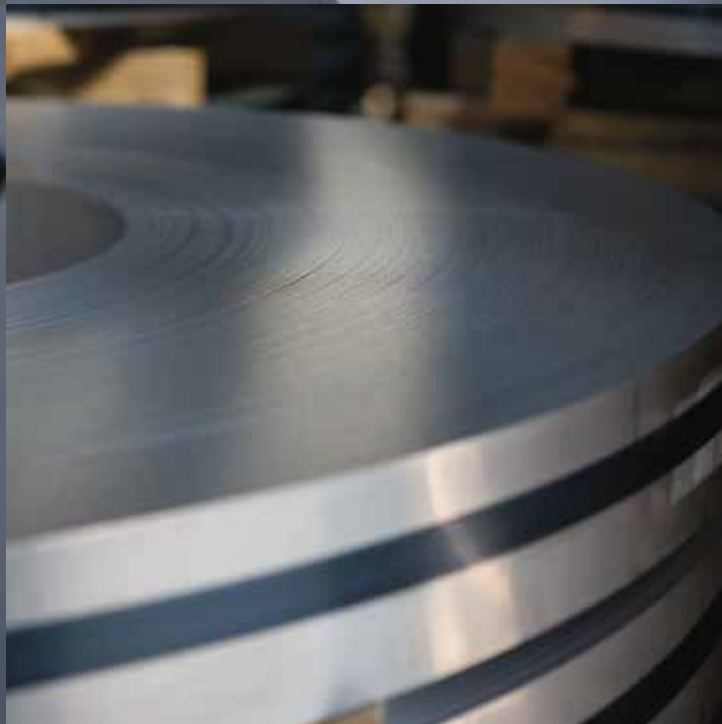

**L'origine della qualità del prodotto è la materia prima.**

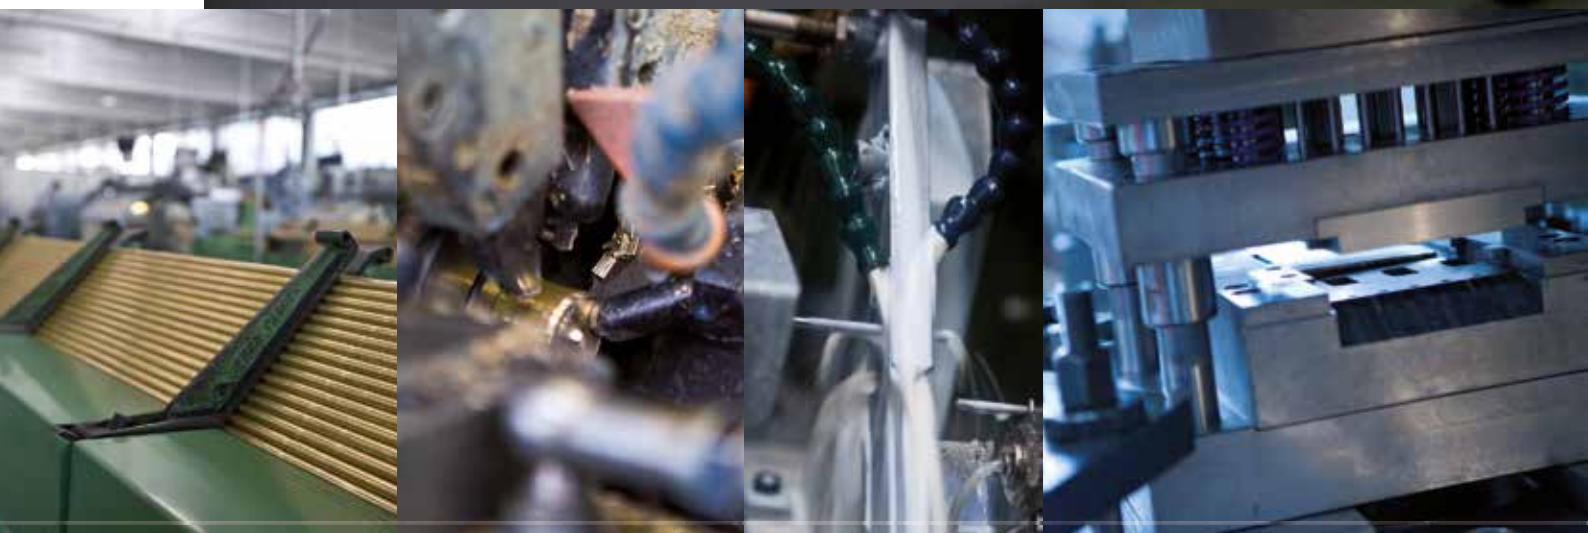

MACO determina la qualità finale dei suoi prodotti iniziando da una severa selezione di materie prime con qualità specifiche per le lavorazioni richieste dai cicli produttivi. Pone quindi particolare attenzione alla scelta dei partner di fornitura per ottenere tutte quelle garanzie di prodotto e di servizio che diverranno certezze da trapiantare nei propri prodotti.

**The raw material is the origin of the product's quality.**

MACO assures the final quality of its products by a hard selection of raw materials which must have specific characteristics for the workings required by the production cycles. Suppliers are chosen with deep care so as to obtain all product and service warranties which are then transferred to its own articles.

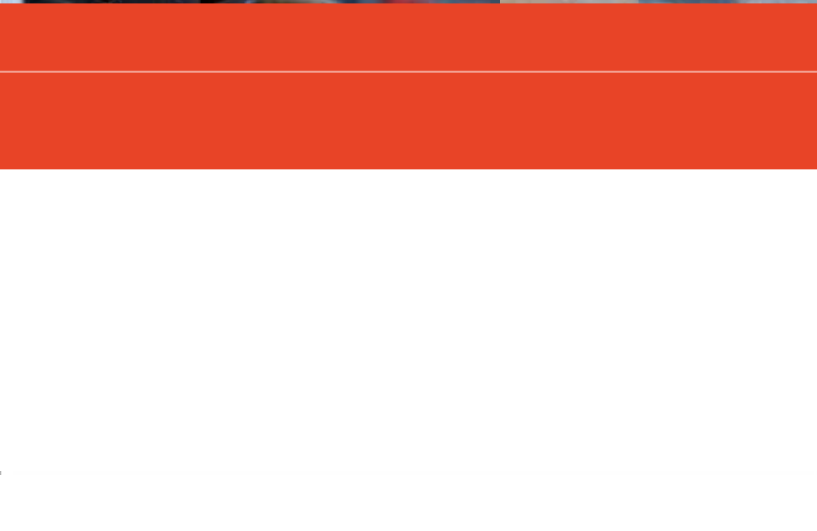

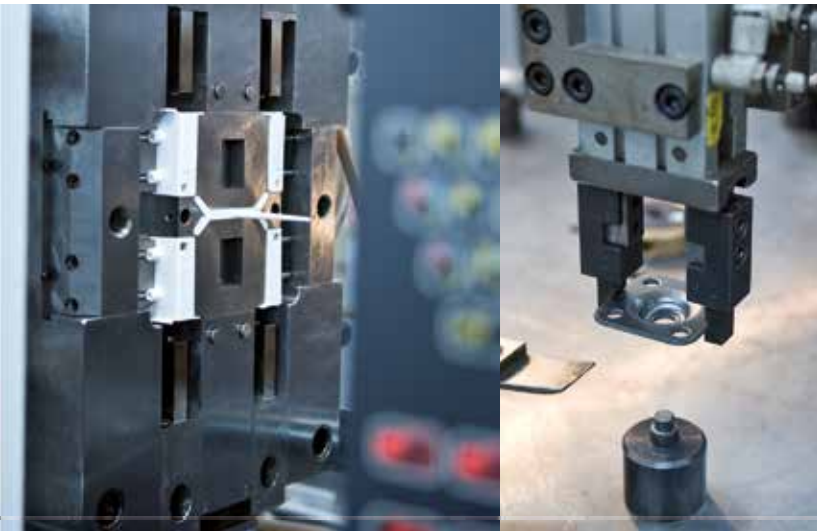

### **Molti cicli in un unico ciclo.**

Il ciclo produttivo della MACO è poliedrico e integrato in un unico metodo che garantisce il rispetto della qualità finale del prodotto. È in realtà un insieme di lavorazioni, tra loro complementari, con caratteristiche differenti che richiedono l'impiego di tecnologie e professionalità specifiche. Sono tante aziende in un'unica azienda, tante professioni in un'unica specializzazione. Tornire, fresare, filettare, stampare, tranciare, assemblare, confezionare sono le tante attività della MACO.

### **Many cycles into one cycle.**

MACO's production cycle is versatile and integrated into one method which guarantees the respect of the final quality of the product. In reality, it is a group of complementary workings with different characteristics which require the use of specific technology and professionalism. Many factories into one factory, many professions into one specialization. Turning, milling, threading, pressing, shearing, assembling, packing are the many activities you find in MACO.

### Un puzzle di elementi per un prodotto unico.

Le lavorazioni dei vari reparti producono semilavorati in materiali diversi che devono integrarsi tra loro per formare un puzzle di elementi in grado di ottenere il prodotto finito. È importante che ogni singolo semilavorato corrisponda perfettamente agli standard necessari per l'assemblaggio automatico o manuale in base al tipo di prodotto finito.

### Many elements to get the final product.

The workings of any department produce semi-finished items in different materials which have to be integrated each other for getting the final product. It is important that every single semi-finished product perfectly corresponds to the necessary standard required by the automatic or manual assembling of any finished product.

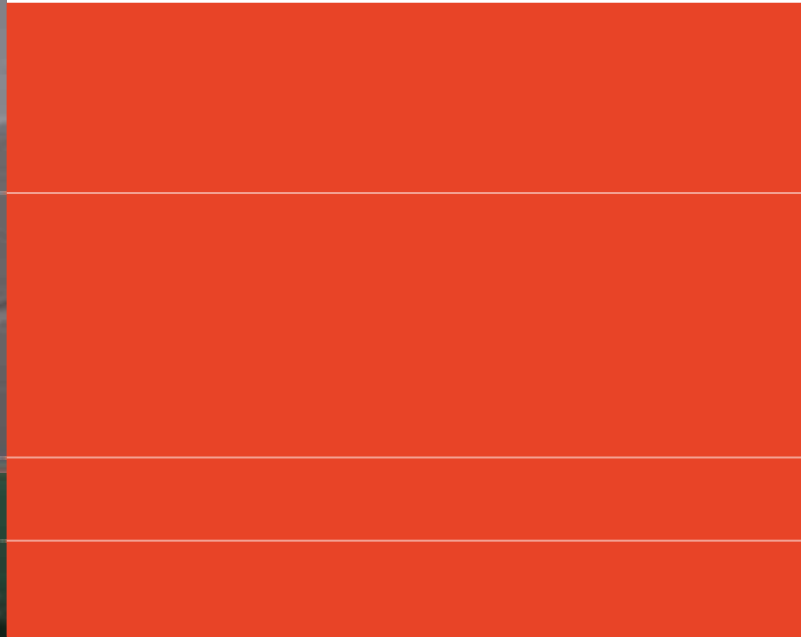

### Tutta la cura possibile dall'inizio alla fine del processo.

Dopo tutte le lavorazioni, l'assemblaggio e il controllo della qualità, ogni singolo prodotto viene confezionato secondo la dimensione, il materiale e le necessità di vendita. Questo delicato processo, non meno importante degli altri, garantisce l'integrità del prodotto durante la spedizione ai clienti e l'immagazzinamento secondo i criteri di stoccaggio e di rintracciabilità dei prodotti.

### The best care from the beginning to the end of the process.

After all workings, the assembling and the quality check, every single product is packed according to dimension, material and sales requirements. This delicate process, which is not less important than the others, guarantees the integrity of the product during the shipment to the customers and the storage according to the criteria of products' stockage and traceability.

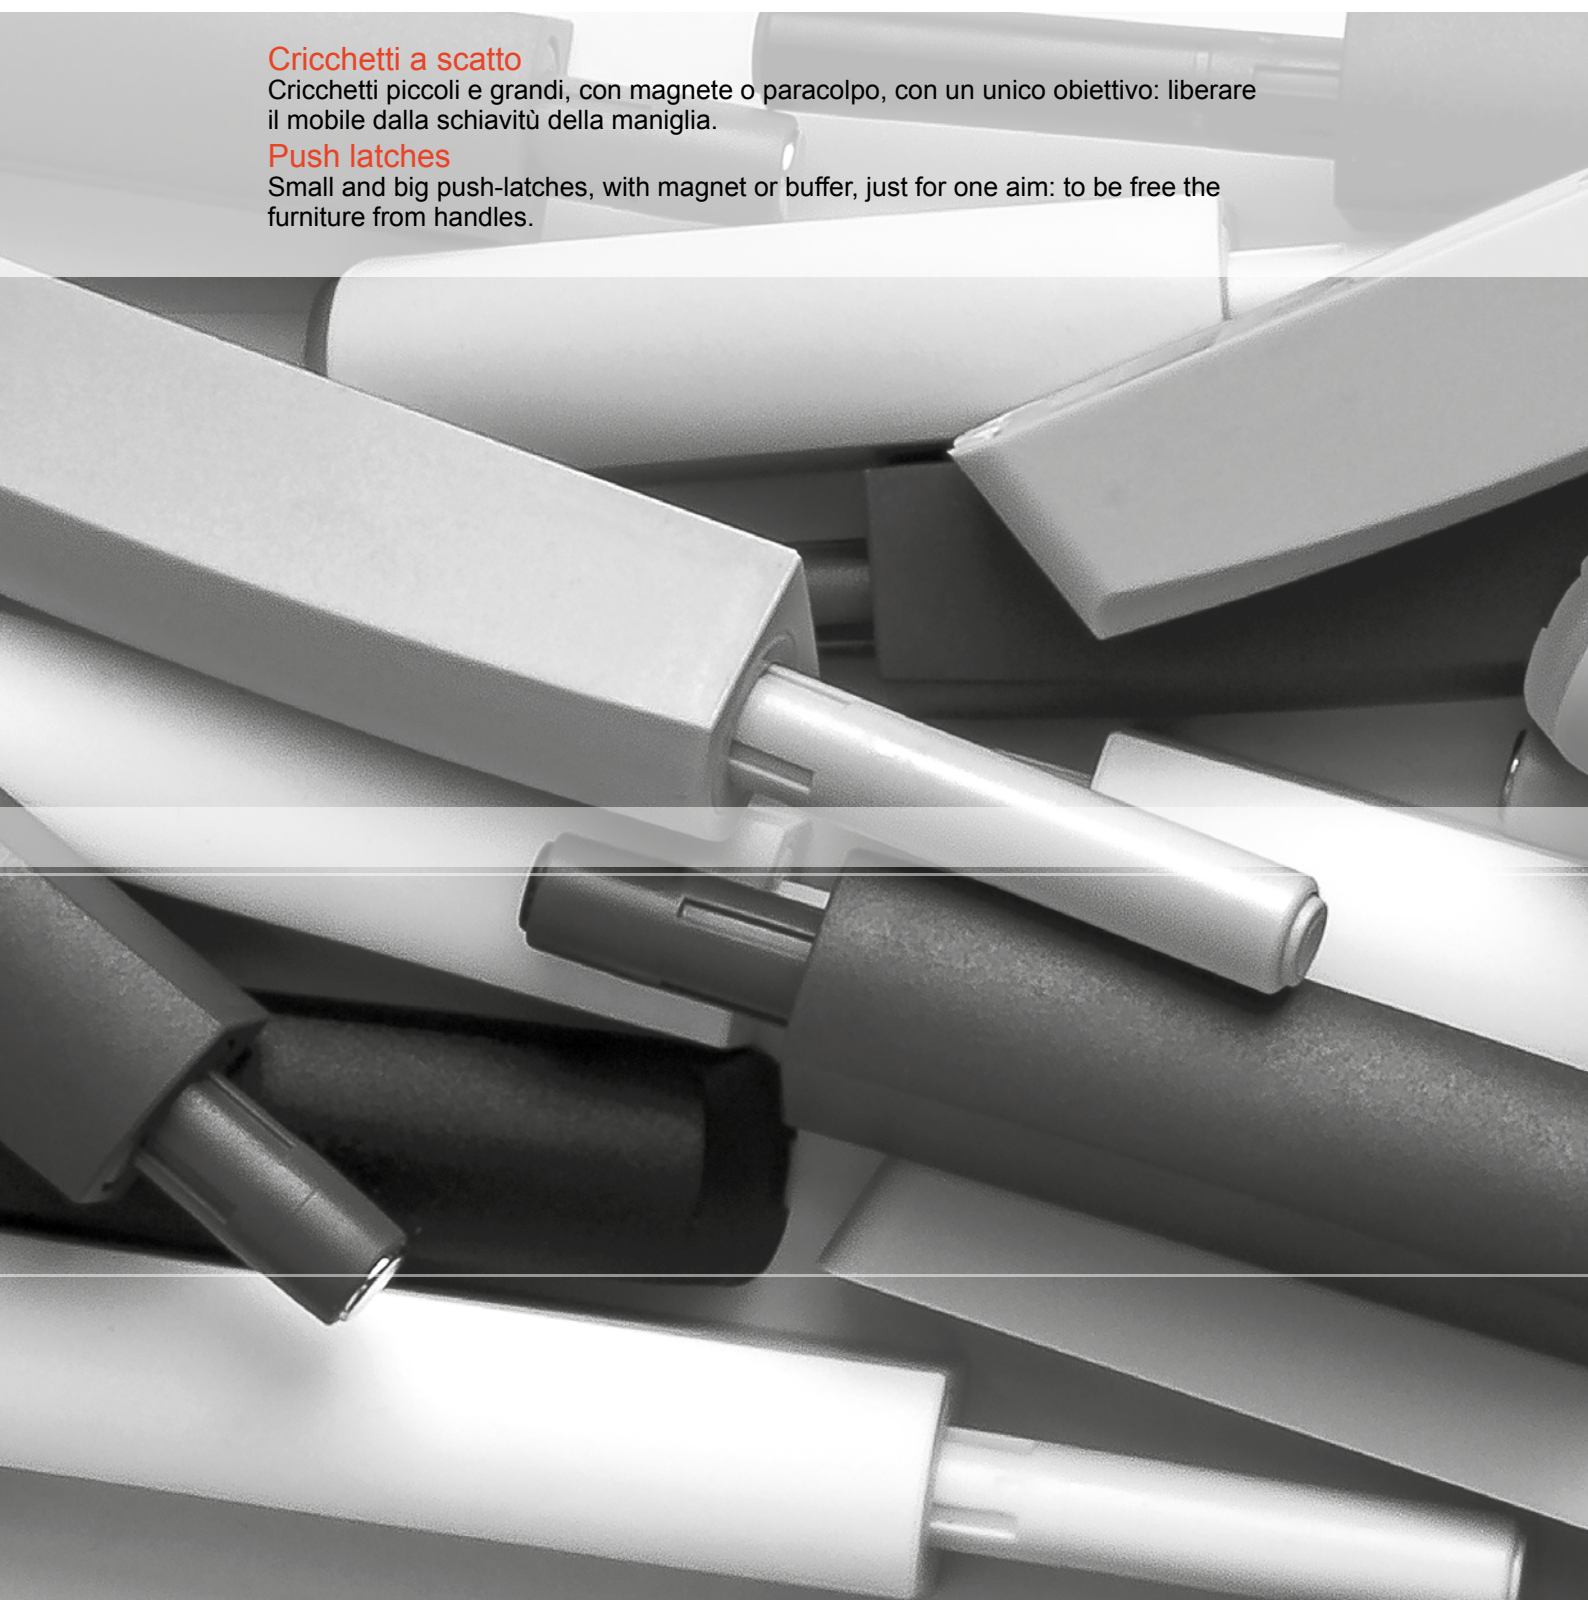

---

### Cricchetti a scatto

Cricchetti piccoli e grandi, con magnete o paracolpo, con un unico obiettivo: liberare il mobile dalla schiavitù della maniglia.

### Push latches

Small and big push-latches, with magnet or buffer, just for one aim: to be free the furniture from handles.

Reggipiano ad incasso con sistema  
di sicurezza antiribaltamento.

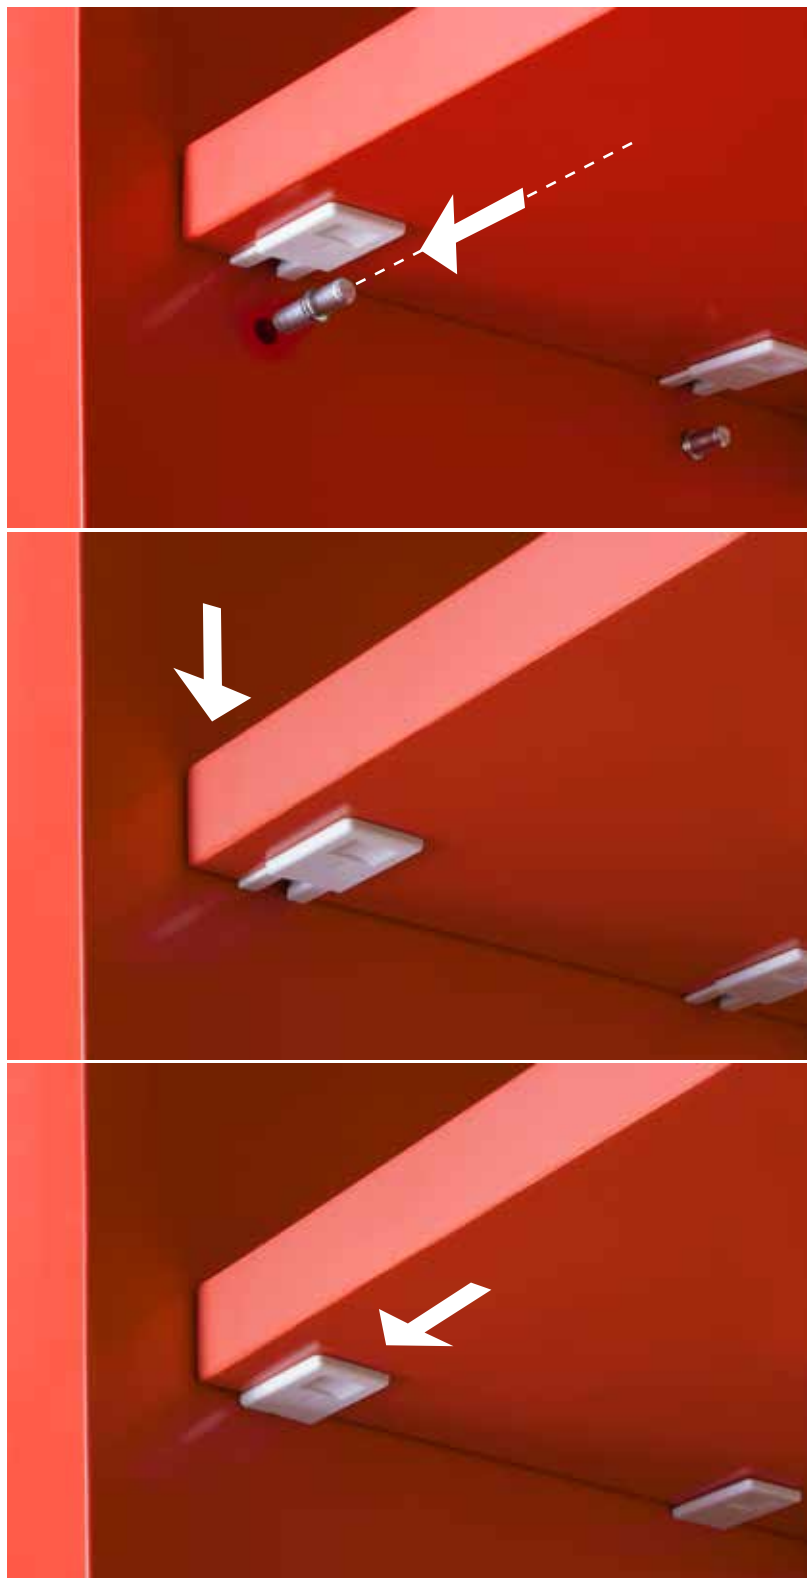

Shelf support with anti-rollover  
security system.

**0951** è l'innovativo reggipiano di **MACO** disponibile nella finitura bianco, marrone, nero, grigio chiaro, grigio piombo (o con sola piastrina nichelata) per adattarsi alla tonalità di ogni mobile. Grazie al perno in metallo e alla carcassa in nylon di prima qualità, è molto robusto e di ottima tenuta. Facilissimo da montare: basta una semplice foratura in asse col ripiano e, una volta infilato, il sistema di sicurezza antiribaltamento è garantito dalla basetta che scorre fino a bloccare ogni movimento e il ripiano non si muoverà più né orizzontalmente né verticalmente. **0951** è il nuovo reggipiano dal design ricercato e minimalista che si integra perfettamente con il mobile offrendo la massima funzionalità e praticità d'uso in tutta sicurezza.

**0951** is the innovative **MACO's** shelf support available in the colours white, brown, black, light grey, lead grey (or just with nickeled plate) so as to match with any finish in any furniture. Thanks to the metal pin and to the high-quality nylon housing, it's very strong and grants excellent stability. Very easy assembling: you just need to make a hole in line with the shelf and, once you insert it, the anti-rollover security system is granted by the plate which slides till locking any motion and the shelf can't move neither horizontally nor vertically. **0951** is the new shelf support with refined and minimal design which perfectly fits with the furniture offering the best functionality and practical use in complete safety.
